

On November 1990, I was charged with a federal felony. I thought getting the best lawyer money could buy would be the answer to everything. WOW was I wrong. I didn't know that me having a drinking problem at the time I committed my crimes could save me up to a year and a half off my sentence with a Federal program for substance abuse program. My lawyer failed to tell me this information. Lawyers don't have the knowledge that FEDERAL PRISON EXPERTS had for me. These prison experts told my family and I all we needed to know about surrendering, conditions of the prison and most of all getting over a year off my sentence. Not only did they provide this info for me they also allow my family to call at anytime for advice help or questions.

Make the call like we did. Federal Prison Experts was for sure the answer we needed.
